## **Your partner for Software Verification and Validation Services**

*Gateway Test Labs has qualified & experienced team for Usability, Functional, Compliance, Compatibility and Security testing. We have focused groups for Mobile app testing, Test Automation, Performance testing and Game Testing.*

Gateway Test Labs provides services to achieve predictable and improved software quality levels - critical from budget and release management aspects.

We work for global clients as extension of own team from various location leveraging time zone and cost advantages. Our expertise and adaptable processes ensure defect detection at earliest stage reducing rework for developers and QA resulting into significant reduction in Cost of Quality.

## **Our Vision & Values**

- Cost of Quality is hidden overhead and impact budget, schedule, competitiveness significantly and service objective is to reduce Cost of Quality as much as possible, earliest.
- Clearly defined objectives and KRA are must to monitor our performance and benefits from transparency and ROI aspects.
- Our service concept, approach, trainings, deliverables are based on solid and proven foundation of ISTQB, IEEE and ISO.
- We are responsible to reduce efforts and time spent on testing and make our clients more competitive from their product cost and quality aspects.

## **Brief list of services:**

- **Unit testing:** As developer cost is increasing, they need to learn new platforms and technologies; we do unit level testing to ensure each component is defect free.
- **Functional testing:** Once all components are defect free, we test integrated modules, also test end-to-end flows in entire product / application.
- **User Experience testing:** End user comfort and industry compliance are critical for product / application acceptability and market growth. We test User interface for this aspects.
- **Performance testing:** Response time, memory – CPU utilization are critical for end user satisfaction. We use open source and licensed tools to test product / application on various platforms (Mac, MS Windows, Android, Symbian, IOS) to ensure performance.
- **Test automation:** Functional test automation using relevant automation framework and open source / licensed tools to reduce acceptance testing, regression testing efforts and time.

**Fact Sheet:**

**Delivery capability:** 110+ software quality professionals – experienced for platforms and technologies: iPhone 4 to Silverlight

**Domain exposure**

- Independent Test Centre setup for leading ERP vendor in EU
- Online Payment Gateway testing for client at U.S.
- Test Center for Online business directory at EU - Managing development teams in 5 different time zones
- Performance Testing for e-mail dispatcher with load of 30 million e-mails
- Usability testing for online survey product deployed on iPhone, iPad and Android platforms

**Technology exposure**

CoE for Microsoft technologies and solutions (Sharepoint and CRM), Mobile, Games and Open Source based solutions
